Ajustando o sistema de layouts

Site (site.html.erb)

Ajustando o sistema de layouts

- Crie novos controllers
 - rails g controller admins_backoffice
 - rails g controller profiles_backoffice
- Altere a herança dos controllers que já existiam
 - ```
class ProfilesBackoffice::WelcomeController <
 ProfilesBackofficeController
```
  - 
  - ```
class AdminsBackoffice::WelcomeController <  
  AdminsBackofficeController
```

Ajustando o sistema de layouts

- Crie os novos arquivos de layout baseado no **application.html.erb**
 - `/views/layouts/admins_backoffice.html.erb`
 - `/views/layouts/profiles_backoffice.html.erb`
- Indique os novos controllers usam esses layouts
 - `ProfilesBackofficeController`
 - `layout 'profiles_backoffice'`
 - `AdminsBackofficeController`
 - `layout 'admins_backoffice'`
